Prof. Jones' Pupils Give Fine Recital

The Grand Theatre was the scene of a pleasant evening on Friday last when on the invitation of Prof. Jones, a goodly number of parents and friends of his pupils at his piano recital.

The work of the pupils throughout showed much pains on behalf of the pupils by the teacher and an extraordinary amount of studio work by the pupils, and it would be hard to single out anyone in a general way as being the star of the evening owing to the difference in the ages and the period of teaching of the pupils, and any special reference we might make will not cast any blur on the performances of the others, but we feel that those who get special mention excelled themselves.

The evening's program opened with the singing of "O Canada" by the girl pupils with Prof. Jones at the piano, followed by a duet by Misses Emma and May Durrant, entitled "Love's Message", in which both girls excelled themselves, going through with but only a couple of minor mistakes that did not detract one iota from a splendid performance.

Emma Durrant was then called upon and picked for her selection "The Robin's Return", one that called for intricate fingering and difficult timing, and at the end drew hearty applause.

May Durrant was the next to take "Gertie's Dream Waltz", a masterpiece for a beginner, and certainly received credit from the fingers of the player, showing in the pianist a coming star.

The next selection was a duet by Misses Agnes Whiting and Edith Hutchinson "Minalet in G", a performance that will long be remembered by those present, it being one of the masterpieces of the evening in which the timing was so perfect that one would think that it was being rendered by an individual.

Edith Hutchinson next on the program gave as her selection, "Sing Me to Sleep", one calling for melody and difficult runs, which were so brought out in the rendition by this coming pianist that would have done credit to one years her senior in experience and age.

Agnes Whiting rendered as her selection, "The Fairy Waltz" an extremely difficult composition in fingering, time and translation, but under the masterful rendition by this young musical genius it was made to appear to the audience as one very simple of manipulation and this as a criterion from one of her age promises well for her in a musical career.

Eileen Webster chose as her selection for the evening "The Anvil Chorus," a selection that one more experienced than she would hesitate to play before an audience. If you might say critics, but she lost nothing in the way of honors by choosing it, as her rendition of it was as near perfect as even the author could have rendered it, and expressed fully the soul of the composer, the highest honor obtainable.

Jean Spiece took for her part in the program "The Blue Danube Waltz" and it would be difficult for anyone to legitimately criticize her selection of this beautiful

Drug Store and Pool Room Burned Friday

Another mysterious fire visited Mirror when on Friday morning about 5.30 the pool hall formerly owned by J. R. Brackney was discovered in flames. An alarm was turned in and soon a number of fire fighters were on the scene, but in spite of valiant efforts, the fire gained headway, and soon the drug store was a seething mass of flames. The intensity of the heat was shown by the fact that all the windows in the store and shop of J. F. Flewelling and R. Sidebottom were splintered. The fire at one time threatened to consume the store of Spiece & Son, but fortunately the wind veered and aided the efforts of the firemen in saving that store. The home of Mr. Devereaux was also consumed together with the entire contents, the family only saving a few clothes. Much sympathy is felt for Mr. Devereaux and family in their loss, as he carried one of the best stocks in the province and it was his aim at all times to give the people the service they demanded. In an interview with him he gave us the pleasing information that he still intends to reside here and will open up on Saturday morning in the Sorum building next to the garage with a new stock.

FOR SALE—Seed barley. Apply to A. Jacques, 1107, Mirror.

Home Has Narrow Escape

What might have been a serious fire with serious consequences happened last week at the residence of Mr. J. Holmes of the Ripley district. The fire was from an over-heated stove pipe, and while running for aid Mrs. Holmes was quite badly frost bitten. Use was made of the telephone to call the neighbors who responded and soon had the fire under control.

Mrs. Devereaux Has Eye Hurt at Theatre

An unfortunate accident occurred at the theatre on Friday evening in which Mrs. Devereaux met with a painful injury the result of being hit in the eye with a missile thrown by some foolhardy spectator in the audience. This seems to be a mania with some of the element that attend the theatre on every occasion. We presume it was some of the same "nuts" for we cannot call them ladies and gentlemen, who have indulged in the same antics before to the great annoyance of the sane and respectable patrons. This class might better stay outside as their absence would never be regretted, until they can learn to conduct themselves as respectable citizens: it would be an asset to the theatre.

Another thing that is to be condemned is the practice of smoking during the run of pictures; surely all smokers can refrain from a smoke for this short period and thus relieve the management of considerable worry, and perhaps great loss from a fire, as it is the habit of many to take no pains to see if they have smoth-

their stube or not. In view of the late disasters from fire whether intentional or accidental, we citizens cannot afford to have the onus of suspicion rest on the towns as being careless or indifferent, and we trust that strict remedies will not have to be invoked to put an end to these annoying practices in order to let the rest of the patrons enjoy themselves when they attend. We trust a warning is all that is necessary and that they will heed it, and to the parents that they see to it that the younger generation is not allowed to.

The Library building was the scene of a large gathering on the 21st when friends and acquaintances gathered to welcome Mr. and Mrs. Martin Watters, whose marriage recently took place in Edmonton. The evening took the form of a reception and shower. A large table was decorated for the occasion with white streamers hanging from the ceiling to each corner; in the centre of which was a large wedding cake. Cards were played until 10.30, when lunch was served, the bride cutting the wedding cake. Immediately after lunch the bride

assisted by the groom, opened the presents, which were many and beautiful, including a beautiful rug and rocking chair, and came from Vancouver, Calgary, points in Saskatchewan and other places. After all had been opened, the bride and groom both thanked all for their kindness. The committee in charge was Mesdames Kehoe, J. Watters, Steele, Stirling, Fraser and Miss Winnie Oldring.

The Primary Class of Mirror United S.S. is holding a sale of work, candy and afternoon tea in the Institute on Saturday, April 30th from 3 to 6 p.m. The proceeds are in aid of the missionary funds of the church. Please come and help the junior girls in this splendid enterprise.

On Saturday, May 7th, at the regular meeting of the W. L. L., a demonstration on making and baking an Angel Cake, will be demonstrated by Mrs. H. G. Williams at 2.30 p.m. Business meeting at 3 p.m. Visitors are welcome.

The picture show this week promises to be out of the ordinary, and no doubt a packed house will see it both Saturday and Monday.

On To The North!

The development of Canada is entering, in fact has already entered a new phase and one which holds promise of adding enormously to the population, wealth, and economic strength of the Dominion. In all the provinces, with the exception of the Maritimes, the attention of government and people are turned northward.

The history of Canadian growth during the first half century of Confederation records development upon east and west lines, beginning with the acquisition by the newly-born Dominion of the Hudson's Bay Co. lands of the west and the building of the Canadian Pacific Railway; then came the construction of the Canadian Northern; and finally the projection of the National Transcontinental and Grand Trunk Pacific across the continent. Practically all traffic moved east and west, and in these western provinces a long homeward journey was frequently necessary in order to travel from one place to another only a comparatively short distance apart on a north and south line.

As a result of this early and quiet national programme of development, Canada became as a country, to say as settlement and trade was concerned, a narrow strip stretching all the way from the Atlantic to the Pacific but consisting of fewer people than are to be found in European countries which in area are smaller than Canadian provinces. Canada had length but it lacked depth, a condition which made for weakness as a national unit because of the great distances separating the people and leading to a too great diversity of interests, a lack of knowledge of the needs and problems of the different sections, Maritimes, Ontario and Quebec, the Prairie West, the Pacific slope—a resultant sectional rather than a national viewpoint. Always there existed the possibility of this thin thread snapping at some point.

It is, therefore, a matter of national satisfaction that Canada is now on the threshold of its second great development—a development northward which will give the Dominion what it has hitherto lacked, depth as well as length. From all points, agricultural, financial, manufacturing, comes the confident prediction that the next two or three decades will witness a complete transformation in this respect, and hardly a week passes that some new enterprise invading northern development is not reported.

Development works, financed by Canadian, British and United States capital and involving an investment of close upon one billion dollars, are under way in Quebec which will result in the establishment of great industrial plants, the employment of tens of thousands of men, the creation of new cities and towns, and an enormous expansion in the trade of the Dominion. There are practically all to the north of present settled areas.

In Ontario, the Provincial Government has decided to push construction of their railway through to James Bay, while throughout both old and new mining areas of Northern Ontario unprecedented activity in prospecting and development is in progress.

Manitoba has awakened to the possibilities of its vast northern territory and, as in Ontario and Quebec, the eyes and energies of the people are being focussed on national and western development there with all that this must mean in industrial expansion. The business men of Winnipeg realize they can no longer depend for future growth upon being simply a wholesale and distributing centre for the west.

The age-old demand of the Prairie West for an outlet on Hudson Bay is at last being met by aggressive action and the last section to be built will, before many months, be completed. The latest discoveries in chrome and iron ore are being made in this work. Airplanes have for weeks been carrying men and supplies from the end of sled to Churchill, other airplanes will patrol the Hudson Straits, airplanes are being employed in survey work in northern Saskatchewan, as well as in northern Ontario. In recent branch lines of railway are to be built in northern Saskatchewan to connect existing railways with the road to the bay, while the Saskatchewan Government has appointed a commission to make expert inquiry into the whole subject of power development within the Province.

Alberta has marked railways well into the north of this Province, and it is now known there exists a wealth of oil mineral and other resources in those northern stretches, as well as vast tracts of fertile lands suitable for agriculture. Investigation is now to be made of the most suitable route for a railway from northern Alberta through British Columbia to the Pacific coast.

Canada has long been a young man's country, a land for the hardy and venturesome pioneer and homesteader. It is a land which offers rich rewards for the energetic pioneer. The possibilities which the westward movement of the early settlers are not wholly of the past; of the northern area during the next few decades Canada's present and future exist in equal measure for the youth of today, and in the development face citizens will find ample outlet for their ambitions and energy, coupled with that element of romance inseparable from the opening up of a new land. For Canada as a whole a large field for investment and constructive enterprise awaits.

Husbands Desert Wives

Pitiable Suffering Caused in Many Cases by These Deserders

The Montreal Star says editorially: "Pitiable suffering is caused by the tragedy of husbands deserting their wives and children. There has been a marked increase of this cruel condition for some years past. Statistics compiled from court records, in our own city, demonstrate the sorrowful fact that fully 23 per cent. of the children placed in institutions of all kinds, and who are practically supported on charity, are 'foundlings' who have been deserted by their fathers. And, think of it, in 21 per cent. of these desertion cases the mother was left ill. Here we have brutal cruelty on the part of husband and father."

For Aches, Pains, The Safe Home Remedy NERVILINE

When sudden sickness comes, when a chill comes in with colds, when the chest and throat sore, when coughing, cold results always follow a vicious rubbing with good old NERVILINE. It is a simple, safe, reliable, NERVILINE is a wonderful friend; it brings ease and comfort so quickly. For young and old, to overcome the minor ills that constantly arise in the home, nothing compares with "Nerviline"—25 cents at all dealers.

Hungarian Partridges

Stock From Alberta Will Soon Be Released in Manitoba

The first ten pairs of Hungarian partridges to arrive through the International Game and Fish Association (order) from the game sanctuary of Benth, Leduc, Alberta, are being sent to the Prairie Farm, southeast of Winnipeg, to be taken care of till the summer opens. This was done in the interests of the sporting community of the Prairie Provinces, it being hoped that the birds will increase greatly in numbers.

A VERY RELIABLE HOME TREATMENT

How Weak, Run-Down People Can Obtain Relief

Among the many remedies offered for the maintenance or restoration of health and strength, there is none can compare with Dr. Williams' Pink Pills. Most ailments are due to poor, thin blood. Dr. Williams' Pink Pills have a specific action on the blood, making it rich, red and pure. Through this richer blood the tissues of the body are better nourished, and the functions of the body better performed. Anaemic, nervous, weak, languid and nervous people speedily find new health and strength through the use of this medicine. This was the experience of Mrs. John Armour, South Monaghan, Ont., who says: "I am one of the many thousands who have regained health through the use of Dr. Williams' Pink Pills, and I take this opportunity of saying a word in praise of this splendid medicine. Before beginning the use of this medicine I was pale and badly run down. I found it difficult to do any housework and was tired and breathless at the least exertion. I had tried several medicines without benefit, and finally decided to try Dr. Williams' Pink Pills. Soon I began to feel better, sleep better, eat better, and found my weight increasing. In a few days I felt like a new person. I have since recommended the pills to others who have taken them with equally good results."

Try Dr. Williams' Pink Pills for anaemic, rheumatic, nervous, nervous. Take them as a tonic if you are not in the best physical condition and cultivate a regular habit that will keep you well and strong. Get a box from the nearest drug store and begin this treatment now. The pills are sold by all medicine dealers or will be sent by mail at 50c a box by writing The Dr. Williams' Medicine Co., Brockville, Ont.

Primitive Russians place a certificate of character in the hands of dead persons, to be given to Saint Peter at the gates of Heaven.

Strangled with Asthma is the only expression that seems to convey truth in relation to the man who suffers from this trouble. The relief from Dr. J. D. Kellogg's Asthma Remedy is beyond measure. Where all else fails, this remedy brings comfort and rest. Breathing becomes normal and the bronchial tubes completely cleared. This unequalled remedy is worth many times its price to all who use it.

The Swiss Industries Fair, the origin of which dates back to the middle Ages, will be held at Basel this year, April 2 to 12.

Spring Time is CELERY KING TIME

Brew a cup of this fine old vegetable tonic. It is all the spring medicine you need. It drives out winter's poisons, improves the appetite and makes you feel better night away. CELERY KING is good for the whole family. At drugists, 35c & 60c.

Y-O-LA

Is unequalled for Dyeing and Tinting. Professional Dyers use the Same Kind of DYES

French Women Honored

Four who Risked Lives to Save British Soldiers Receive Annuities

Four heroic French women who concealed British soldiers from the Germans for months and even years, the risk of their own lives, have received London's tribute of praise and gratitude at the National House.

Before a big assembly of British and French Staff Officers and sub-officers to the fund raised in their behalf, the Lord Mayor presented to Misses Julie Daudin, Belmont, Robert, Angèle Lesur and Louise Gordon annuity certificates and it luminated addresses setting forth Great Britain's acknowledgment of their devotion.

It was a ceremony which vividly recalled the World War, and it had a poignant climax when an English father suddenly knelt to kiss the cheek of Miss Gordon who for thirteen months had concealed his son behind the German lines.

After all that time the son, Corporal Hall of the Eleventh Hussars, was betrayed. The Germans shot him and condemned Miss Gordon to death, a sentence which later was commuted to twenty years' of hard labor.

Her husband escaped only to lead an existence of great suffering until the armistice and then to die, a victim of his courage in helping to harbor the young soldier.

At the closing scene, when the Marchioness crashed out in honor on the footstep of Prince, followed by the British national anthem, tears glistened in the eyes of all four women and few in the audience remained unaffected.

An interesting exhibit in the hall of the Mansion House was the famous photograph in which Miss Belmont-Gordon hid Trooper Patrick Fowler of the Eleventh Hussars for more than three years.

To Visit Hudson Bay

Hon. C. A. Dunning Will Make Tour Over Northern Route Six Days

Hon. C. A. Dunning, Minister of Railways; Major Graham Bell, Deputy Minister, and Frederick Palmer, British consulting engineer, will visit Port Nelson and Port Churchill on Hudson Bay in July of this summer. The minister's party, including several engineers, will leave the present end of steel on the Hudson Bay Railway and proceed by canoe to Port Nelson. From there it is possible that the party may fly north to Churchill. At the present time there are no direct flights from the coast to Churchill, since early in the year.

Two Fokkers have been moving men and supplies from the end of steel to Churchill for several weeks past. At the present time there are no direct flights from the coast to Churchill, since early in the year.

The minister's party, including several engineers, will leave the present end of steel on the Hudson Bay Railway and proceed by canoe to Port Nelson. From there it is possible that the party may fly north to Churchill. At the present time there are no direct flights from the coast to Churchill, since early in the year.

Jasper National Park

Jasper national park in Alberta, with an area of 1,196 square miles, is one of the largest "playgrounds" in the world. A part of this reserve to the north of the central section is still unexplored, but the park is being rapidly opened up by the construction of trails and highways.

To Acquire Country Elevators

Construction or acquisition of country elevators at 57 points, has been decided upon by the Saskatchewan Wheat Pool. It is officially announced. This will raise the number of elevators owned by the Pool to 611.

For diastemp—Minard's Liniment. "Say, you don't know what real trouble is." "I don't. I once let it be known to a few friends that I wanted to insure myself."

An Oil of Merit. — Dr. Thomas' Electric Oil is not a jumble of medicinal substances thrown together and pushed by advertising. It is the result of the careful investigation of the healing qualities of certain oils as applied to the human body. It is a pure, clean, and it was and kept public favor from the first. A trial of it will carry conviction to those who doubt its power to repair and heal.

More natural discoveries of importance have lately been made in the Portland canal area, Prince Rupert district.

Keep your secret from your friends and your enemies will never get next to it.

A Sensitive Camera

Can Photograph Objects at a Distance of 300 Miles

Distant objects invisible to the human eye may now be photographed by a camera perfected by the Army Air Service.

The secret lies in the special film, which is sensitive to light rays that do not register on the eye. It is pointed out that in time of war, a plane equipped with this camera could take perfect pictures of enemy positions while the plane itself would be far out of range and sight of anti-aircraft batteries.

An essay test could be photographed 200 miles off shore. The device may be used against the run fleet, for the position and name of each ship could be caught in a single picture taking in 200 square miles. It also has been suggested for forest patrol fibers for the exact location of fires.

Sold First Matches

Handred Years Ago

Invention of English Chemist Brought Him Modest Income

The centenary of the match has just been observed in England. Many noteworthy persons have taken part in the match and its inventor, John Walker, a chemist of Stockton-on-Tees.

It is recorded in Walker's sales book that he sold a box of friction matches to John Nixon 100 years ago. Although what had been called matches, but were really wicks, had been sold before, Walker's match was said to have been the first practical one. In two years Walker sold only 250 boxes of matches but after that the demand was great enough to furnish him a modest income.

Walker's box contained 600 matches and sold for a shilling. With it went a piece of sand paper. Ready-made Medicine. — You need no physician for ordinary ills when you have at hand a bottle of Dr. Thomas' Electric Oil. For colds, coughs, croup, throat, bronchitis, asthma, it is invaluable; for sprains, burns, scalds, it is unsurpassed; while for cuts, sores and the like it is an unquestioned healer. It needs no testimonial other than the fact that it will satisfy anyone as to its effectiveness.

Britain's Air Defence

Dangerous for Air to Fall Too Far Behind Other Nations

Public interest in aviation in this country is at a deplorably low ebb. It simply does not begin to compare with the interest taken in France and in Germany, and in the latter country especially civil aviation has developed to an extent which leaves us far behind. In part this may be accounted for by the smallness of these islands and the greater obstacles to commercial success, but it is manifestly dangerous for Great Britain to fall too far behind, for an instructed public opinion is required if we are to maintain the number of air squadrons which are no less necessary for purposes of national defence than for the Navy in the days when the air was trackless.

London Daily Telegraph.

A man seldom walks erect when straightened out by circumstances.

GUM-DIPPING Builds Extra Miles

THE Firestone process of Gum-Dipping is one of the most important contributions to more economical highway transportation.

By this process, every fiber of every cord is thoroughly saturated and insulated with rubber, minimizing friction and heat so destructive to tire life.

On the cars of thousands of thousands of motorists, in the day-in and day-out service of the largest truck, bus and taxi fleets, in the battle of time on race tracks, Firestone Gum-Dipped Tires, because of their greater stamina, are delivering longer mileage with added safety and comfort.

The Firestone dealer in your locality sells and services these extra quality tires. Let him tell you of the trouble-free service that the Gum-Dipping process insures and he can save you money. See him to-day.

VERY HARD LARGE PIMPLES

Spread Over Face and Hands. Cuticura Heals.

"My trouble began with a few pimples on my face and hands and soon spread all over them. The pimples were very hard, large, red, and feasted and scaled over. They itched and burned so that I scratched them, which caused eruptions. My face was disfigured, and I could not put my hands in water and could hardly do my work. A friend advised me to try Cuticura Soap and Ointment so I purchased some, and in about two months I was completely healed." (Signed) Miss Jennie Buchanan, 411 Quince St., Newark, N.J.

Cuticura Soap, Ointment and Tablets are all you need for every-day toilet and nursing purposes. Please ask for Cuticura Soap, Ointment and Tablets at all drug stores, or write to Cuticura Soap, Ointment and Tablets, 1111 Broadway, New York, N.Y.

A Confederation Prize For Literature

Recognition For the Most Outstanding Book of the Year

A Confederation Prize for Literature, to be awarded annually to the author of the most outstanding Canadian book of the year, has been suggested by the Canadian Authors' Association in connection with the celebration of Canada's sixtieth birthday.

The National Executive of the Authors' Association by a unanimous vote has memorialized the Prime Minister, suggesting the setting aside of one-tenth of the \$250,000 Diamond Jubilee Fund to endow in perpetuity such an annual prize for the encouragement of Canadian literature.

Kill warts with Minard's Liniment.

WORLD HAPPENINGS
BRIEFLY TOLD

Sir Esmé Howard, British ambassador at Washington, and Lady Howard, will this year visit Western Canada.

There has been a movement to abolish the present law making the President eligible as a candidate to succeed himself.

Two fine autographed engravings of the King and Queen will occupy a place of honor in the new Canadian legation.

El Salto observatory, near San Diego, announces that several volcanoes in Southern Chile have become active.

A Royal Air Force bombing aeroplane crashed at East Church, Kent, Eng., and its four occupants were burned to death.

Quebec provincial general elections will be held Monday, May 16. Non-factions will take place May 3. These dates were announced following a meeting of the cabinet.

An Exchange Telegraph dispatch from Cairo says that the Egyptian Government has resigned. The Egyptian ministry was formed on June 6, 1936, with Adly Yeghen Pasha as premier.

Discovery of a radically different treatment of the American form of sleeping sickness from any yet described, and what may lead to a successful eradication of this disease was announced by Dr. Frederick A. Farrell, of Providence, R.I., its discoverer.

A fossil of unusual interest has been found in the workings of No. 2 mine at Glace Bay, Nova Scotia. The petrified form had the appearance of a crocodile or alligator about two feet long and was discovered embedded in the submarine area about two miles under the Atlantic.

Would Mean Serious Struggle

Vast Alien Interests in China Likely to Prevent Nation Going Bolshevik

Chang Tse-li has declared himself ready to welcome any form of popular republican government in China, but is opposed to interference by the Soviets.

In China money can do anything. It is therefore conceivable that if the Soviet government cares to spend money enough, the prejudices of Chang Tse-li may be overcome. If China goes Bolshevik she will probably follow the example of her prototype, and repudiate all her obligations. However, in view of the vast alien interests in China, and the rights vested by treaties in certain foreign powers, it is unlikely that China will be able to become a Bolshevik without a serious struggle.

There could be no talk of a conquest of China such as aforesaid she often suffered, though she always subsequently absorbed the invaders. But the Chinese warlords are so accustomed to compromise in face of superior military forces that the outside powers would be tempted to secure by invasion, and the temporary occupation of strategic trade centres, adequate guarantees that the obligations of China would be discharged. No grave military difficulties would attend such an operation; but it would not hasten in the amiable way that America, Britain and other powers most desire the economic and social development of China.

Alberta Irrigation Projects

Irrigation projects in Alberta which are actively in operation are making good, generally speaking, according to the annual report for 1935 of the Alberta Irrigation and Drainage Council. There are now eight cooperative projects in active operation in the province, involving a total acreage of 160,446 acres, of which 138,236 acres are irrigable.

Western Fox Ranches

According to the secretary of the Canadian National Silver Fox Breeders' Association, Manitoba now has 59 registered ranches and 225 men here; Saskatchewan 23 ranches; Alberta 109 and British Columbia 83.

A feature of the Edmonton Exhibition this year will be another historical pageant, commemorating the diamond jubilee of the Dominion.

SUNDAY SCHOOL LESSON

MAY 1

PETER'S DENIAL AND REPENTANCE

Golden Text: Let him that thinketh he standeth, take heed lest he fall. I Cor. 10:12.

Lesson: Mark 14:33; 51, 66-71; Luke 22:61, 62; John 18:27-30.

Devotional Reading: Psalm 111:9.

Explanations and Comments

1. In the Palace of the High Priest, Mark 14:33, 51.—The time is after the arrest and arrest in the Garden of Gethsemane. Two painful scenes are being enacted in the palace of the High Priest. Peter, who had followed Jesus afar off, and had entered "very close" into the court of the High Priest, Peter was obsessed by hatred, bent on delivering him up.

Below in the courtyard sits Peter. He had followed Jesus afar off, and had entered "very close" into the court of the High Priest. Peter was obsessed by hatred, bent on delivering him up.

The courtyard was the inner quadrangle, around which the palace was built. With the officers (doublets the military guard who had delivered up his prisoner and were waiting for further orders), Peter was warned by the High Priest.

"Silence, and apprehensive at a word." The bold disciple of the Lord, who had been the brother's friend, now stands before the High Priest, flinching to hear his two faint names.

Banded with Christ's defiant to deny. Last one should fiercely whisper, "Cudjery!"

The tongue, abrupt to censure or confess, is stilled by occasions harsh dis- (vow).

The steady eye that flamed in love or hate, now wide eye in eye of that wait.

O Peter! Canst thou then so soon forget? The grace on Herman's Mount that halloved thee.

While yet the tears upon his cheeks were warm, From Bethany and grim Gethsemane. — Elwood Lindsay Hains.

Winnipeg Newspaper Union

Promoted by British Investor

John E. Baird, young British investor, claims to have established television between London and New York. He proposes to give a wireless telephone—television demonstration between London and a New York store shortly. A special receiving set has been built for the purpose.

Mr. Baird said that for several weeks he carried on his experiments between his station at Coulson and a station twenty-five miles outside New York. A new station is being installed in America by means of which Mr. Baird says it will be possible to demonstrate the practicability of his invention. If these tests are successful, Television, Limited, the company of which he is technical director, will place a television receiving set on the market at a cost of \$150.

Widespread interest was aroused in London by the successful television experiments between New York and Newington. Although many experiments in television have been made in Britain, engineers of the General Post Office are not co-operating with the scientists on both sides of the Atlantic who are trying to bring this new development into use in each of the public. A post office official, questioned on the subject, replied, "There is much to be done before the post office aims at a public service of television."

Plan Memorial at Ottawa

The Canadian Club of New York as the largest and most representative Canadian gathering in the United States has decided to take the initiative in raising funds by popular subscription to a suitable memorial or tablet on Parliament Hill at Ottawa to express, on the occasion of the sixtieth anniversary of Confederation, the sentiment of devotion to their native land of Canadians residing in the United States.

The Changing West

Senator W. A. Buchanan, publisher of the Lethbridge Herald, addressed the Toronto Young Men's Board of Trade recently on "The Changing West," pointing out the transformation in progress from strictly grain growing to mixed farming, with industrial centres developing, all tending to broaden the economic and labor basis of the West.

White Star Liner "Albertic" 19,000 Tons, Largest Ever to Sail From Montreal

Another page in steamship history will be written this season when the Albertic, of the White Star Line Canadian Service (shown above) docks at Montreal at the end of April, as this will be the biggest steamer ever to sail up the river St. Lawrence as far as Montreal.

Previous to this season the Doric and Regina sister ships in the White Star Line Canadian Service, held the record for being the largest steamers to enter the port of Montreal. They are 16,000 tons each, but the Albertic is 19,000 tons and, therefore, 3,000 larger than the Doric and Regina.

The Albertic is an R.M.S.P. steamer, she was formerly known as the Ohio, one of the world famous "O" liners. She will join the St. Lawrence fleet with a reputation equal to her size and, in addition to being the biggest steamer ever to sail up the St. Lawrence to Montreal, will be one of the most luxurious to make Montreal her terminal.

The Albertic will be used on the direct service to Liverpool and London, while on the westbound route she will call at Queenstown. She will leave Liverpool on her first westbound voyage under the new name on April 22 and will steam out of Montreal on her first eastbound voyage on May 7.

Built in 1923, the Albertic is 587 feet long, 72 feet wide and 37.6 feet deep and she has seven decks. "A" is the observation deck; "B" is the boat deck on which are located the smoking room, the lounge, the reading room and a few staterooms.

"C" is known as the promenade deck. It is partially glass enclosed and it offers the incentive to exercise, which, in turn develops the healthy appetite.

On "C" deck too are the luxurious suites comprising bedrooms, with separate beds, sitting room and bathroom while on "D" deck are a few more suites, and staterooms, together with the dining room, the haven of refuge after big appetites have been created on deck in the tummy sea air.

There are three other decks, "E," "F" and "G" which are used for staterooms where passengers can be assured of a restful sleep after the activities of the day on the spacious decks.

The equipment of the Albertic embodies the latest designs in wireless telegraphy and submarine signalling apparatus, drop-proof and watertight bulkheads, combined semaphore and Morse signalling appliances, while among other features there are a board for the convenience of passengers, two barber shops, a ladies hair-dressing parlor, and a library.

The Albertic will make eight voyages from Montreal this season, on May 7, June 3, July 2, July 30, August 27, September 24, October 22 and November 19, and on all these voyages she will carry cabin, tourist third cabin and third class passengers direct to Liverpool. On her last trip of the season she will call, en route, at Glasgow.

Claims Television Has Spanned Ocean

New York-London Demonstration Promoted by British Investor

John E. Baird, young British investor, claims to have established television between London and New York. He proposes to give a wireless telephone—television demonstration between London and a New York store shortly. A special receiving set has been built for the purpose.

Mr. Baird said that for several weeks he carried on his experiments between his station at Coulson and a station twenty-five miles outside New York. A new station is being installed in America by means of which Mr. Baird says it will be possible to demonstrate the practicability of his invention. 15 Kinds of Tours
Europe & Return

These tours are so varied in itineraries, in interest, in duration and in cost, that you may choose one that particularly meets your requirements and purse. White Star Standard of Service is assured in each.

\$155 Thos. Read's to England
Return fare. Family party, third class, personally conducted by Rev. W. G. Walsh. Return date optional within one year. Sailing to Liverpool on magnificent

\$155 3rd Old Londoners' Re-Upon
Personally conducted. An excellent opportunity to cross with home folks on the magnificent

\$155 Sons of Scotland to Glasgow
Go home with your own home folk, personally conducted by Mr. Robt. Street of Toronto on magnificent

\$155 Round Trip Tour
Royal National Eisteddfod Holyhead, Anglesea, North Wales, Aug. 1st to 6th. Sailing on superb White Star Liner

\$170 Manx Society Excursion
Manx Homecoming Tour 1927. Lands at Douglas direct. Answer the call to all Manxmen from their Ellis Vannin. Cross with brother Manxmen on the magnificent

\$170 2nd Northern Ontario Excursion to England and Return
Tourist Third Cabin, under the direction of Mr. T. Mostley Williams, New Liskeard, Ont.

\$260 Home Tours
Pilgrimage to Rome, 57 days. \$875. Cabin class, all necessary expenses included. Visiting principal cities in seven European countries. "Charles Francis" Tours (study French while touring Europe) \$600 for 24 days, to \$880 for 32 days, depending on length of tour and places visited. All necessary expenses included. Both Home Tours sail from New York on Manx Red Star Liner

\$267 Canadian Legion Tour - 36 Days
Tourist Third Cabin including all necessary expenses

\$315 European Treasure Tours
Cabin or Tourist Third Cabin

\$345 18th International Rotary Convention - 30 Days
Oxford June 5th to London June 25th. Optional excursion tours in England, Holland, Belgium, France, Switzerland and Italy of 30-44-58 or 65 days with costs ranging from \$425 to \$850. Leaving Montreal on magnificent

\$375 Special Tour of Ireland - 32 Days
By popular request. Under auspices of the Daughters of Isabella and the spiritual direction of Reverend Father Thomas J. Heenan, Chond and Italy of 30-44-58 or 65 days with costs ranging from \$425 to \$850. Leaving Montreal on magnificent

\$385 Popular French Tour - 37 Days
Personally conducted. Visiting 5 countries, 27 cities. England, France, Belgium, Switzerland and Italy. Choice of Tourist Third Cabin or Cabin class of Cabin for \$500. All necessary expenses included. Sailing on superb White Star Liner

\$390 Pitman Tours - 38 days
Tourist Third Cabin

\$390 Hubbell College Tours - 37 Days
Tourist Third Cabin

\$495 Thos. Cook & Son's Tours
Variety of tours to Europe from \$495 for 39 days to \$725 for 60 days, depending on length of tour and places visited. Tourist Third Cabin, all necessary expenses included. Sailing from Montreal on beautiful White Star Liners.

\$495 Doric, June 25-July 23, - Albertic, July 2
Regina, July 7th.

Regina, July 7th.

Correcting Social Ills

Parental Qualifications Necessary for Training of the Rising Generation

The home and lack of proper training of children in the home have been publicly blamed for a wide array of social ills, ranging from the first age to crime. In brief, the responsibility has been placed on the parents.

Such being the case, what constitutes a good parent? What are the qualifications for a father or for a mother?

A. D. Hardie, an outstanding English educationalist now directing the educational division of social hygiene work in the Dominion, recently summed up the matter for local workers. His findings follow:

Qualifications of a father:

1. Good health. Good stock and a desire to keep himself and his children fit and ready for a long life by proper exercise and regular physical examination.

2. Companionship with his children. An ability to see things from their point of view. An ability to retain their confidence in all matters.

3. Good general knowledge, so that his conversation is worth listening to at home.

4. A good example to his children, especially in his attitude towards his wife and all women.

Qualifications of a mother:

1. Good health. Good stock and a desire to keep herself well for the good of her home.

2. Sympathy, such as only a mother can have, in all that concerns her husband and children.

3. Good knowledge, the result of study and not of insinuation of child education.

4. A good knowledge of the physiology and physical and spiritual needs of her sons as well as her daughters and an ability to prepare both for the adventure of life.

Women Physicians

More Confidence Now in Women Doctors Than in Former Years

Eight prospective women graduates from the faculty of medicine in the University of Toronto were honored at a dinner by the women's College Hospital. Speakers, who told of the experiences met with by women doctors in the early days, included Dr. Augusta Stowe Gullen, whose mother, Dr. Emily Stowe, was the first woman doctor in Canada. To achieve that position, it was necessary for her to attend the medical college, where she was the only student of her sex.

Dr. J. W. S. McCullough, provincial M.O.H., declared that the women's hospital of Toronto, which was the only one in Canada, was not together too modest and unassuming. Public opinion had changed greatly and there was far more confidence in women doctors than there had been in the past, he said.

English Farthing To Go

Dry Goods Trade Will Eliminate Coin From Price Calculations

The farthing, Britain's smallest coin, is doomed. Sooner or later, merchants say, it will have to disappear. The Dry Goods Chamber of Trade, which is the central organization of the dry goods trade, has just decided to eliminate the farthing from its price calculations. Hence small articles, such as spoons of cotton, will either be priced in halfpence or sold by twos. A farthing is worth about half an American cent.

New Canadian Industry

A cable from London, England, reads: "Following the perfection of a method for the production of artificial wool from pine needles by Italian and German scientists, a British financial and industrial corporation is in touch with the Quebec Provincial Agents' Office investigating the possibility of establishing such an industry in Quebec province."

Passenger — "What makes this train so slow?"

Conductor — "If you don't like it, get off and walk."

Passenger — "I would, only I'm not expected until train time."

The eyes of a frog when exposed to the light of a candle, will generate an electric current easily measured on a galvanometer.

He—talked with a very interesting man today. He was a Baptist. She—Oh, I'd love to meet him. All my geraniads are willing.

One kangaroo will eat as much grass daily as six sheep.

W. N. E. 1678

Nurse Crops for Alfalfa

Many Advantages Are Shown For Using Nurse Crops When Seeding Alfalfa

There is considerable advantage in using a nurse-crop when seeding down alfalfa. It greatly reduces the initial cost of production, and, except where the land is comparatively clean, helps to prevent the weeds from retarding the development of the young alfalfa plants. The sowing of the nurse-crop tends to hold the snow and thus reduce the possibility of winter killing.

Tests were made, during the last three years with wheat, oats, barley and flax as nurse crops, at the Brandon, Manitoba, Experimental Farm. In all three years, flax, on account of its shallow root-system and the small amount of shade it caused, proved the least detrimental to the young alfalfa plants. Wheat, on the average, was better than oats or barley as it stands up better and its smaller leaf development allows more sunlight to reach the alfalfa.

In the experiments the alfalfa was seeded at the rate of 10 pounds per acre, while the nurse crops with the exception of the flax, was sown at a slightly smaller rate than when normally used. In seeding, the alfalfa seed was sown with the grain in the grain box.

British Youths for Alberta Farms

Will Make Selection of Boys in England for Farm Training

Instructions are being sent to Hon. Herbert Greenfield, immigration agent for Alberta, in London, to look after the selection and recruiting of another 75 British boys for farm training in the government agricultural schools. These lads are to be of 18 to 21 years of age, and Mr. Greenfield, who will cooperate in the matter with the Overseas Settlement board, and the Dominion immigration officials is being asked to exercise particular care in his selection. They will come on next autumn in time for the fall term of the schools.

Hon. George Howley, minister of agriculture, says that the results of previous efforts in this line have been highly satisfactory, with a better average of success among the 151 boys thus far brought out under the scheme than in any similar group of new comers. It is hoped, however, to raise the standard still higher and to that end Mr. Greenfield's personal supervision in England will be involved.

Pasture Crops for Growing Hogs

Rape Is Proven to Be Best Pasture, Being Better Than Millet or Oats

Tests of different pastures for growing hogs have been made at the Brandon, Manitoba, Experimental Farm. The pastures used were rape, millet and oats. In this experiment, rape had double the carrying capacity of either millet or oats, one eighth of an acre of rape providing forage for seven hogs for forty-eight days. The hogs on rape pasture gave an increased revenue of \$54.40 per acre over those on a bare lot, while the hogs on millet pasture gave \$29.40 and those on oats \$13.60 more per acre than the bare lot hogs.

It is important to provide shade for pigs on pasture, and to take steps to prevent sunburn especially during the first two weeks of pasturing.

His Luck Still Held

A woman with a particularly disagreeable expression had been holding forth to the man sitting next to her at the dinner party.

"Ah," she said at last: "my husband has always been lucky. As a child he was thrown by a horse, but wasn't injured; as a youth the ice broke beneath him, but he wasn't drowned; and as a young man he was caught in an avalanche, but escaped unhurt."

"Yes," put in the man, quietly "but strangest of all he has now been married to you for twenty years and is still alive."

Housekeeper Must Be "Mrs."

Mrs. Victoria Grant has now become Mrs. Victoria Grant. She didn't acquire a husband, but was appointed housekeeper at Balmoral and it is a long-established custom that royal housekeepers acquire the title of "Mrs." "Madame," Mrs. Grant is the daughter of A. P. Grant, former head gamekeeper at Balmoral, Queen Victoria was her godmother.

The amount of time given to reading a newspaper depends upon two things: the newspaper and the reader.

Visitor to studio: "What is it?" Artist: "I'm amazed. Haven't you ever seen one?"

Visitor: "Yes, that's why I asked."

Our High Wealth Average

Western Provinces Have the Highest Per Capita Wealth in Canada

We have a good deal about the wealth of the Dominion being concentrated in the east. For this the income tax figures are responsible to a large extent. It is true that there are a great many more rich in the west than in the east, but the fact is that the returns from this income tax do not mean that the general level of wealth is greater in those provinces than with us.

Census statistics that have just been issued show that it is not. The per capita wealth of Ontario is put at \$2,507, and that of Quebec at \$2,317, while the respective figures for Manitoba, Saskatchewan and Alberta are \$2,762, \$2,737 and \$2,637. It is the average that counts and the information that is furnished by the bureau is very enlightening. It demonstrates on what a solid basis Western Canada now rests, though it is still so near to the beginning of its development.—*Edmonton Journal*.

Seaplanes May Be Used

Would Reduce Flying Time Between London and Paris

Folks who travel from Paris to London and vice versa by air have long deplored the loss of time caused by the distance of the flying fields of Le Bourget and Croydon, from two and three hours, where as the actual flight takes less. Experiments with seaplanes, which would be made between points in the Seine and the Thames, almost in the hearts of the two capitals, and if successful the time will be greatly reduced.

The hides from 670 steers were used recently to make the largest leather transmission belt in the world.

Bill—"Jerry is clever." Mac—"Yes?" Bill—"The rememberer isn't his birthday but forgets her age."

A pessimist is a man who prefers artificial light to genuine sunshine.

Norwegians for the West

Here are some of the two hundred Norwegians from the Norddalen, Heddal and Valdres districts of Norway grouped in picturesque attitudes on board Canadian Pacific steamer Montrose, who recently settled in the prairie provinces. In their own country these have been very hard since the war and they have been unable to make the best will in the world to make a living. Under the circumstances, the District Council of the region decided that, rather than give them relief from the rate for an indefinite period, it would be better to pay for their transportation to Canada and to hand each adult the sum of twenty-five dollars for personal expenses on the way. This money is repayable to the council at the option of the beneficiaries. The party was under the personal supervision of Erik Plathe, chief clerk in the C.P.R. office at Bergen, who spent a month in the west to investigate conditions there at first hand and who will report on them when he returns to Norway, with a view to sending in all six hundred of these fine agricultural settlers from the district to the Dominion of Canada.

Cleaning Dairy Utensils

Boiling Water or Steam is Necessary for Sterilizing

A plentiful supply of boiling water or steam is a necessity for the cleaning and sterilizing of pails and other utensils if a bacteriologically clean milk is to be obtained. Detailed instructions for cleaning dairy utensils is contained in a new pamphlet on "Producing Clean Milk" issued by the Dominion Department of Agriculture. The utensils should be rinsed in cold or lukewarm water immediately after using, and then they should be washed well in warm water to which soda or a dairy cleaning powder has been added. After washing, the utensils should be rinsed in clean hot water to remove traces of the cleaning solution.

But even this is not altogether sufficient. Utensils that appear to be perfectly clean may contain many thousands of germs. Where steam treatment is available the steaming is best done by placing the utensils in a closed container and blowing steam into it for 15 minutes. Inverting the cans or pails over a steam jet for a couple of minutes is also a good method. When live steam is not available the utensils should be immersed in scalding water for at least two minutes. Don't use a cloth to dry the utensils as it will only add germs.

Clean utensils, however, are only one item in the production of clean milk. Equal care must be taken of every stage from the time the milk leaves the cow until it is consumed or used in manufacture. What the necessary precautions are, is told in the new pamphlet which may be obtained from the publications branch, Department of Agriculture, Ottawa.

Our Modern Marvels

Apparently we need not expect telebration to be in practical operation for some time. Still, science goes ahead rapidly nowadays. Before we know it, the radio set may have become a radio-brain set. The tales that occupied a thousand and one Arabian nights no longer field any greater wonders than our modern marvels.

The same pastorate has been kept in the same family for more than 200 years at Kristdala, in northern Sweden. Since 1708 fathers and sons of the Mearling family have been elected to the office.

Coronation Chair Most Famous

But Others Worthy of Notice Have Been Preserved for Centuries

The coronation chair in Westminster Abbey, which contains the Stone of Destiny, probably is the most famous chair in the world but there are many others worthy of notice. The chair in which the hapless Charles I. sat during his trial in Westminster hall is kept in a glass case in the second room of the Cottage hospital, Gloucestershire. At Langford Castle, Wiltshire, is an armchair of solid steel presented to Emperor Rudolph III, by the people of Augsburg in 1577.

It is said thirty years were required to make this chair, and it is valued at \$200,000. It is covered with historical and symbolical scenes, each said to be the work of a great master. One of the most beautiful chairs is that of Dagobert, king of the Franks, who died in 638. It is made of cast and chased bronze of fine workmanship.

One Way to Solve Problem

Get in Ural Mountains Imprisoned in Cellars All People Over Forty

The people who have become extremely complacent of recent years cannot be denied, and the problem of coping with it is one that is exercising the whole world. There is, however, one sect which considers it has solved the problem.

The sect called "The Undergrounds," inhabits a remote part of the Ural Mountains. It has come to the conclusion that "life is too complicated to be dealt with by anyone over the age of forty. Consequently, any person who reaches that age is put away with solemn rites."

The under-people, on his or her fortieth birthday, is conducted with lighted candles and melancholy songs to the cellar of his or her house. There under the fatal age then returns upstairs to celebrate the removal of the useless ones, who never again see daylight, and when dead is buried in the same cellar.

Old Spanish Recipe Found

Record in Monastery Tells How to Make Table Delicacy

Spain's "lost bread" has been rediscovered in the recipes of an old monastery, and now is all the rage as a table delicacy. It is a sort of fritter with a cinnamon flavor. The old recipe is as follows: Cut ordinary white bread into fingers, and pour over them the yolk of one egg beaten up in a glass of Malaga wine. Dip the soaked strips in beaten egg and fry to a golden brown in deep boiling lard. Drain well and sprinkle with cinnamon and sugar.

Assembling a Meal

President Roosevelt Baxter of Abilene college said at a Lincoln's birthday reception in Abilene:

"School teachers and college professors don't grow rich, but at that they're better off than they were in Lincoln's time."

"Lincoln used to tell a story about a school teacher who said to his pupils one day:

"If each child will bring an egg to school tomorrow I will show you how Christopher Columbus made the egg stand on end. Those who cannot bring an egg kindly bring a piece of ham."

Keeping a Secret

They were discussing whether women or men were the most trustworthy in business.

"No woman can keep a secret," said one man, scornfully.

"I don't know so much about that," retorted the upholding, looking woman seated opposite him. "I've kept my age a secret ever since I was 24."

"Oh," he replied, "you'll let it out one day though. Mark my words."

"Never!" she exclaimed. "When a woman has kept a secret twenty years she can keep it forever."

Alberta Oil Development

The Union Oil Co. of California has closed a contract to drill another deep test well in the new Wildcat oil fields of Alberta for the Canadian Western Natural Gas, Light, Heat & Power Co., a subsidiary of the International Utilities Co. The Union Company is also to drill a deep test well in the Viking field, while the Imperial Oil Co. is drilling a 2,500-foot well on another large block belonging to the International Utilities Corporation.

Mrs. Waring (on the phone): "Hello, is this the Information Bureau?"

Voice: "Yes, madam. What do you wish to know?"

Mrs. Waring: "Well, if it isn't too much trouble would you please tell me how much Mrs. Taylor paid for her spring hat?"

The World's Storm Factory

Worst Weather Experienced Between Thirtieth and Seventieth Parallel of Latitude

We think of the Arctic region as a country of terrible frosts and storms. This is a mistake. From the seventieth degree of latitude, which runs through the middle of Greenland, the north of Alaska, and the top of Siberia to the North Pole, is a fine weather area. Storms are rare, the snowfall is not great and the barometer stands high and steady for weeks on end.

South of latitude thirty—that is, a line running through Southern China, North Africa and cutting the American continent from New Orleans through Northern Mexico—we have another broad belt of fine weather. Storms are really fine as far further north; yet a space where the barometer is usually high and where it is possible to predict the weather for some day in advance.

It is between these two parallels of latitude that the world's worst weather is experienced. The whole of the North Atlantic between these parallels is a breeding place of bad weather, and a large part of the United States and Canada may be included under the same heading. The British Isles lie in the worst part of this vast storm factory, and are subject to changes of climate more rapid than those experienced in any other part of the Northern Hemisphere.

Conditions in the Southern Hemisphere are somewhat similar to those in the north, only worse. Owing to the size and height of the Antarctic Continent the cold at the South Pole is far greater than at the North, and the zone of bad weather is broader.

Thousand Traitorous Words

Interesting Dictionary Achievement Revealed in French Court Case

Eleven hundred "traitorous words," essentially alike in English and French, but quite different in meaning, have been dug out of the dictionaries. It took a lawsuit to bring this to public notice. A young philologist, M. Koezler, situated at the Sorbonne, found 100 of these words, but to supplement his work he arranged with Professor Derocquery of Lille to aid him. The professor found 700 more words. When Koezler read the printed results he learned his name was to be second on the title page and objected.

The French court settled the dispute by ordering that the two names be put on the same line with a long space between them, making it appear they were on an equality. It decided, however, that Koezler, as the originator, ought to have his name at the left, so it would be read first.

Queer Custom In India

Widow Wears Husband's Skull on Chain for a Year

A widow of the Isle of Andaman, off the coast of India, is not permitted by custom to forget her husband quickly for a new avian, said Mrs. Gertrude Emily Banham, English globe trotter, who passed through San Francisco, recently en route to Guatemala.

Mrs. Banham said that in Andaman when a husband dies his widow wears his skull on a chain for a year. During the second half of that period she adds his jawbone in memory of happy arguments they had. At the end of the year she puts away the jawbone and the skull is open to new proposals.

The traveller displayed the jawbone of somebody's husband, the widow-own having acquired a fresh jawbone, which at last reports was still wagging.

One or the Other

The bashful bachelor encountered a neighbor, a young mother, and wishing to be negligently asked:

"How is your little girl, Mrs. Jones?"

"My little boy is quite well, thank you," replied the proud mother.

"Oh, it's a boy!" exclaimed the bachelor, excitedly. "I knew it was one or the other!"

Record Price for Steer

A record price of \$950.00 was realized by "Elapses Lad," at the auction of the cattle at the Brandon Winter Fair recently. This steer won the boys' and girls' calf-feeding competition for his young owner, Glen Campbell.

Many Immigrants Arriving For eleven months of the last fiscal year, ended February 28th last, 122,750 immigrants entered Canada. This was 12,600 more than the record for the whole of the previous fiscal year.

Embarrassing Position Experienced By Bronx Lady

Miss Jeanne Glesberg, Bronx, N.Y., writes: "I had become accustomed to arising each day with a heavy head, dizziness and bad taste in my mouth. My bowels were frequently clogged and constipated. One day I became so sick to my stomach I had to leave my important job and go home. A friend advised me to take CARTER'S LITTLE LIVER PILLS. I feel greatly relieved since using them and whenever my stomach and head go bad again I'll certainly know what to do."

CARTER'S LITTLE LIVER PILLS are sugar coated, small, easy to swallow, purely vegetable, and relieve the bowels free from pain. They tone the system as they are purely vegetable and do not contain Mercury, Calomel or other poisonous drugs.

CARTER'S LITTLE LIVER PILLS, 25c and 75c red packages.

Benefactor To Human Race

Founder of Antiseptic Surgery Made Many Serious Operations Possible

Monday, the most brilliant of the Victorian historians, declared that the greatest benefactor to the human race was the man who cured two kinds of grass which only one had grown before. But what then is the due name of him who is credited with having saved more human lives in the latter days of the nineteenth century than were lost in the wars of the hundred years that preceded it? That was said of Joseph Lister, the founder of antiseptic surgery, the humblest of men, who, by the use of his hands, saved more human lives than were lost in the wars of the hundred years that preceded it. That was said of Joseph Lister, the founder of antiseptic surgery, the humblest of men, who, by the use of his hands, saved more human lives than were lost in the wars of the hundred years that preceded it.

Contrary to the theory which had prevailed from early Chinese and Greek times, that all fever which accompanied the smallpox was a necessary part of natural healing, Lister proved not only that suppuration was not necessary but that it was the preventable cause of death following certain wounds and many other operations. Hospital gas became so common it no longer was possible to remain in it as necessary evil. Lister was put on the right track by reading a paper by Pasteur, in which the great Frenchman had shown that putrefaction was due to the presence of minute living "germs" and not to the air itself. As a result of his own experiments Lister came to the conclusion that the only way to prevent festering was to keep the germs out. One of the most daring operations was when he used carbolic acid a violent poison to prevent infection in surgical cases. Another great contribution to surgery was his substitution of "ergot," which is absorbed in time to kill and other materials, themselves the cause of trouble, used up to then for sealing wounds in human tissue. Lister's new system enabled surgeons to venture on brain, chest and abdominal

Mrs. E. Searls Broadcasts Good News

—Hawthorne Studio—

Windsorlock, Ont. — "I found Dr. Pierce's Favorite Prescription excellent as a tonic and nerve restorer. My windows, weakened state of health. My nerves were all upset, I could not sleep and had very little appetite. I took Dr. Pierce's Favorite Prescription and found it very helpful. It sharpened up my appetite, strengthened my nerves, and I could sleep. It built me up in health and I felt better in every way. I think the 'Favorite Prescription' is the best medicine any woman can take." Mrs. E. Searls, 471 Canterbury St.

Any druggist or dealer in druggists, or send it to Dr. Pierce's Laboratory in Hingham, Ont., for trial pack of tablets.

Authority on Agriculture

Dr. Grisdale Has Intimate Knowledge of All Phases of Basic Industry
Dr. J. J. Grisdale, deputy minister of agriculture, who is chairman of the executive committee of the world's poultry congress to be held in Ottawa this year, is recognized as the foremost authority on agriculture and agricultural conditions in Canada. The work which he has been called upon to undertake and the experience which he has gained during the 20 years of his government service in the federal department of agriculture have given him an intimate knowledge of all phases of Canada's basic industry.

Born at St. Charles, Que., in 1876, he received his early education at Valcartier High school and at Albert College, Belleville, and spent two years at Toronto University. He subsequently entered the Ontario Agricultural College at Guelph, where he won the gold medal for his work. He completed his agricultural education at the Agricultural College, Ames, Iowa, where he graduated with the degree of Bachelor of Agriculture.

He first entered the service of the Government of Canada at the central experimental farm, where he had charge of the work in animal husbandry and field husbandry carried on in the experimental farm system. He succeeded the late Dr. Wm. Saunders as director of experimental farms in 1911, and during the period 1911-1915, when he held that post, the experimental farm branch gained a reputation, and his work was one of the most important in the development of Canadian agriculture.

In 1918, when the department of agriculture was reorganized, he was placed in charge of the work in animal husbandry, and became a permanent agricultural department. Dr. Grisdale has been deputy minister, and the same year he was granted the degree of D.Sc.A. by Laval University.

Since his appointment as deputy head of the department, Dr. Grisdale has, on several occasions, been called upon to act as agricultural adviser to members of the Government in negotiations vitally affecting the agriculture of the Dominion. In 1922, he assisted in the presentation to the Imperial Conference of the Canadian case in regard to the importation of cattle, and the final result was the removal of the embargo which had been in existence for 20 years.

In 1925, he accompanied the Canadian delegation to the Imperial Conference on agriculture, and was a member of the research council of Canada, and joint chairman of the tuberculosis and rural communities of that council.

Greatest Business Asset

Good will is the result of confidence and satisfactory experience. Good will is the greatest asset of any merchant or manufacturer. It is attained and maintained by judicious advertising, and it can be kept up by constant iteration and repetition. What better medium could possibly be used than the advertising columns of newspapers.

New Idea For Houses

Houses should turn their backs on the noisy streets, says Leonie Vail, an authority of Paris. Houses should be built to face on a central court, according to M. Vail, with a garden for the children and quiet for the family. He remarks that taking houses away from the street is a reversion to the older types, but is justified.

A soft bed will build up much more energy for the sleeper in six hours as a hard bed will in eight, says the conclusion reached by a noted psychologist.

Speaking of fruit, the first apple cannot eat a lot of trouble for the first year.

Accidents in London Increase

Figures Show Three Killed and 130 Hurt Every Day

One thousand and twenty persons were killed and 12,215 were injured in street accidents last year in Greater London. In other words three people were killed every day and 130 were injured.

These figures are revealed in a report by the London and Home Counties Traffic Advisory Committee.

The number of fatal accidents in Greater London has increased from 657 in 1920, to 1,029 in 1926, while non-fatal accidents, in the same period, have more than doubled, from 21,925 to 47,312. The proportion of children killed, however, shows a steady decline, and this, the committee consider, is largely due to the steps taken by the authorities to teach school children to avoid the risks of the streets.

Comparison is made with the figures for the United States, and the committee report that the death rate in America is approximately double that in Great Britain.

It is estimated that there are now 250,000 motorically propelled vehicles in Greater London.

Crossing the road is the cause of the largest number of deaths among pedestrians, but the number of fatalities in which children are most likely to be involved has almost a marked diminution.

"The time has passed," the committee say, "when a pedestrian can step from the pathway without first carefully looking to see whether he can cross in safety."

Old Law Not Rescinded

Passed in Queen Elizabeth's Day Penalized Non-Eater of Fish

Chancellor Winston Churchill is telling a story to his friends not how during his search for a new means of taxation to meet the enormous deficit, he discovered a law on the statute books which was passed in Queen Elizabeth's day, and was rescinded, decreeing that every person in England must eat fish on Wednesdays of each week.

If a man did not want to eat fish and many did not—he could get an exemption license by paying £250 (about \$100). Many paid for the license, and until 1605 Queen Elizabeth had issued her subjects a license to obtain money for the crown.

The quaint English law still holds good, says the Chancellor of the Exchequer, and every one who does not eat fish on Wednesdays is liable under the Government £250.

Not Altogether Unfortunate

Someone has decided that the letter "E" is the most unfortunate letter in the English alphabet, because it is always out of tune. For even in Ebb, never out of danger, and in Eel, never out of danger. Without it there would be no Meat, no Life, and no Heaven. It is the centre of life, and although it starts off in Eerie, it ends by making Love perfect.

Many numbers can testify to the virtue of Mother Graves' Worm Expeller. Another proves they know from experience how useful it is.

When a woman can't think of anything else to say to her husband on occasions like his to her so fast or smoke so much.

Bladder Weakness

Remedied by Gin Pills

Buffalo man recommends them for kidney and bladder trouble

Gin Pills bring you quick relief from urinary and bladder troubles. They soothe the kidneys and bladder and get rid of that burning sensation; the frequent desire to urinate is overcome; brick dust deposits disappear. You can again enjoy comfort by day and sound sleep by night. Thousands of people are relieved of bladder and kidney troubles every year. Read what George F. Hostetter, Buffalo, N.Y., says of Gin Pills.

"I suffered from bladder weakness and frequent urination. I had tried many other remedies, but no relief. After taking Gin Pills, I felt better and after a few days had a complete recovery. I can now enjoy my life and am no longer suffering from kidney and bladder trouble."

If you have headaches, backache, uric acid, pain in the kidneys, dizziness, frequent urination, or any of the above, Gin Pills will correct them. See a box at all druggists. The National Drug & Chemical Co. of Canada, Limited, Toronto, Canada.

BILIOUSNESS

Sick Headache, Sour Stomach, Constipation easily avoided and Liver troubles easily relieved by Chamberlain's Tablets. Never sicken or grip—25c.

Weight of British Debt

Amount Owed to Stripes Placed at 6,700 Tons of Gold

Great Britain's debt to the United States would make a ship of gold weighing 6,700 tons. Lieut. Col. E. S. Anson, secretary for the Londoners, estimated in a speech at the annual dinner of the Mining and Metallurgical Institution, London.

"Therefore," he added, "our debt to America is more onerous for the present than mining engineers than for the future."

The British debt to the United States was funded in 1922 at \$1,500,000,000.

Is More Than Pleased

With Results He Got

Manitoba Man Speaks Highly of Dodd's Kidney Pills

Mr. W. G. Kemble Used Dodd's Kidney Pills for Weak Kidneys and Found Them Very Beneficial.

Manitoba, Man. (Special). — "The benefit is one of the many letters of praise which we are constantly receiving. It comes from Mr. W. G. Kemble, of Waterloo Street, Winnipeg, writing up to me the number I used to have bad pains in my kidneys. I was told to try Dodd's Kidney Pills and what a relief. I have to thank the person many times for telling me about Dodd's Kidney Pills. It was a great relief. I would not be without them."

That Mr. Kemble's trouble came from the kidneys is evidenced by the fact that he had Dodd's Kidney Pills. When the kidneys become clogged or out of order, the impurities become built up in the blood and the result is weakness and lack of energy all over the body. This condition is not only disagreeable but dangerous as well. The impurities in the blood are the seeds of disease. Guard against these diseases and get back your accustomed energy by taking Dodd's Kidney Pills.

Had New Experience

At Bird Sanctuary

Famous Naturalist Proves That "Wild Geese" Are Not Wild

John Stullford, famous naturalist, whose bird sanctuary at Kingsville, is one of the show places of Ontario, has contended for a long time that the Canadian wild geese is not wild—that it is a domestic bird.

He had a new experience while entertaining a party of visitors at his place, who arrived there at dawn to see geese flock from the lake to his ponds. He was attempting to show the visitors how to charge the birds from one pond to the next. He had a new experience while entertaining a party of visitors at his place, who arrived there at dawn to see geese flock from the lake to his ponds. He was attempting to show the visitors how to charge the birds from one pond to the next.

Veteran "Mountie" Dead

John Stullford Member of First Contingent to Reach MacLeod

John Stullford, 85, believed to be the last survivor of the first contingent of Royal North West Mounted Police to reach MacLeod in 1875, died here recently after the best part of a lifetime spent in Alberta.

Mr. Stullford came to MacLeod with the famous French police expedition, the year before Colonel MacLeod headed his forces into the territories. He lived in MacLeod ever since.

The dead veteran was buried here with full military honours, a unique feature of the ceremonies being that six veterans of the police expedition of 1874 acted as pallbearers.

Misery Out in Half

Friend: "Well how do you like being married?" You were always in mourning when you were a bachelor. "Oh, it's a new bother, I think. Before I was miserable at home and miserable when I went out, and now I am only miserable at home."

Customer

"Oh, dear, and I simply cannot not walk a step in shoes that pinch like that."

Shoe Clerk

"I'm sorry, madam, but you've tried all our different styles. These shoes are the ones you were wearing when you came in."

The worst of some people is that they only keep quiet when you are talking so that they can think of something to break in with.

Germany's Burden Easy

Tax Load of Englishman Is Two Thirds More Than Taxator's

Once more the British will have brought home to them the truth that war is an expensive business. Already the most heavily taxed people in the world, they heard from Winston Churchill that they must pay yet more taxes to meet the annual £286,000,000 and £280,000,000.

Of this tremendous sum, which, it is calculated, means that every Englishman works one day in five for the Government, half goes for debt charges. Of this £116,000,000, more than nine-tenths, goes toward carrying the £7,000,000,000 or £25,000,000,000 the World War cost Britain.

This calls attention to how much more it is costing Britain to liquidate her war expenditures than it is costing Germany. Using dollars for ease of calculation the English Government owes \$25,000,000,000 and her debt charges are \$2,000,000,000 annually. Germany having wiped out her debt, even the Dawes plan reduces the present total value of which is estimated at \$11,000,000,000. Under the maximum annuities she pays \$600,000,000 yearly. She pays two-thirds of that amount this year. That it will be seen that it is costing German taxpayers about one-third as much as it is costing British taxpayers to care for the war debt.

The French this year appropriate 25,000,000,000 francs, or about \$900,000,000. The debt charges are about the same proportion to the budget as the British, but less than half on a gold basis. The French war debt cost is thus 50 per cent. more than the German maximum.

Uncanny Imitation

Of Human Voice

English Inventor Makes Organ-pipe Reed Speak Clearly

By the use of an organ-pipe reed, his fingers and a bellows operated by foot, an English inventor has succeeded in imitating the human voice to an extent that is uncanny. The device is not only so realistic that the fingers as the tongue and lips. He recently produced the sentences, "Hello, London; are you there?" as clearly as if he were telephoning from New York. It is claimed that the expected human voice that the device produces is largely a mechanical result of muscular and nervous action.

THAT BABY OF YOURS

Keep Him Well With Aid of Baby's Own Tablets

No mother can afford to neglect the health of her baby. Baby's Own Tablets, a laxative sometimes so that the stomach may be kept sweet and the system clean.

Formerly the laxative medicines given to children were of the harsh, cathartic kind, such as castor oil, sugar lozenges, and so on. But now Baby's Own Tablets, easily administered and pleasant to take, have superseded these. The children like Baby's Own Tablets.

Not only as a laxative but in many other ways these Tablets are given to children to relieve their ailments, such as indigestion, colic and vomiting, prevent constipation, check diarrhoea, soothe teething troubles and promote healthy, natural sleep.

You can get Baby's Own Tablets at any drug store, or write to Dr. Williams' Medicine Co., Brockville, Ont.

222nd Battalion Re-Union

Association to be Formed of Former Members of This Unit

At a Reunion Dinner of the 222nd Battalion held in Winnipeg recently, it was decided to form an Association for the purpose of having an annual Reunion and keeping former members of the unit in touch with each other. Full particulars of the association can be obtained by communicating with Lt. Col. J. S. Lightfoot, of Lightfoot's Transfer Co., Winnipeg, or Mr. Jas. Hennessey, ex Hydro Officer, King St. Winnipeg. It is hoped to make this association a real success and its former members of the battalion are urged to send in their names and addresses.

Minard's Liniment soothes tired feet.

Mary Radtke-Phone Calls

The Postmaster-General announced that in the end of March the number of trans-Atlantic radio telephone calls passing between England and America was 257 westward and 233 eastward.

No need to suffer with corns, or to run the risk of getting them. He must them surely and painlessly with Minard's Corn Remover.

Was So Nervous

The Least Noise Made Her Jump

Mrs. W. H. Yates, Ashern, Man., writes: "I was bothered very much with my heart and nervous, and the least noise would make me jump and almost stop my heart beating."

I told my mother about it one day, and she said that she had been bothered the same way and told me to get a box of

MILBURN'S HEART NERVE PILLS

When I had taken this one box I felt quite a lot better and by the time I had taken three boxes I got relief."

Price 50c a box at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Little Helps For This Week

That old may learn, and all 1932 be comforted.—1 Cor. xiv. 21.

When God gives to us the clearest sight.

He does not touch our eyes who have, but sorrow.

—John Boyle O'Reilly.

We must suffer in ourselves before we can truly help others, and we must suffer greatly before we can love wisely. When it is so we may not be able to tell, unless it be that only those who gain a thorough knowledge of ourselves. There is in the heart of man a secret chamber where God has put all humanity. Himself, touch the door with the hand of suffering and it flies open, and man finds himself one with all others, and God himself in the midst of them.

—Theodore T. Munger.

Develop For McMurray Tar Sands

Arrangements by the Alvarado Co., of California, to install a \$200,000 plant at Fort McMurray, Alberta, for the development and extraction of asphaltic deposits in the tar sands there are nearing completion.

The American quick lunch, with its high stools, flapping napkins, cups of "lean air" and shrill cries of waiters, has invaded Mexico City.

Siesta are broken up the crowd flock to eat sandwiches at the new white tables.

The indications of worn are restlessness, grinding of the teeth, plucking of the nose, extreme nervousness, often convulsions. Under these conditions one of the best remedies that can be got is Dr. Williams' Pink Pills. They will attack the source of the trouble, and they will give you a return of the attack will not be likely.

Girl students at William and Mary College who do not make eight in their studies may not have "dates" and other social privileges.

Continued from page 1

piece that was so much a favorite
of those of riper years, and the
execution of it so perfect that it
brought back to them remem-
brances of many happy times.

Little Aileen Spice was given
that old simple ballad that so many
of us remember, "Long, Long Ago"
rendering it in a tone of simpli-
city and expression that brought
in volumes the true thought of
the composer who wrote it late in
life as a memorial dedicated to
his life under the influence of kind
and loving parents, and surely
covered herself with glory.

Ruby Humann rendered the
"Huntsman's Chorus", showing in
her playing that she has great
possibilities as a master hand at
the piano, rendering this beauti-
ful thing with expert fingering
and time and at the finish re-
ceived a mighty hand-clap.

Eleanor Watters played her se-
lection in a capable manner, al-
though a little nervous, mainly on
account of being late in arrival,
which is a great handicap when
appearing before an audience, but
outside of that upheld the honor
of the class in the expression she
put into her playing.

Martin King chose the difficult
selection, "The Melodies of Love"
and outside of a little over-an-
xiousness during certain portions
of it, gave a masterful perfor-
mance, bringing out expression and
time that would have done honor
to one more experienced than he.
Prof. Jones has unearthed a
find in the person of Eric Eisner,
who took as his selection, "Mar-
ling Through Georgia" a selection

CANADIAN NATIONAL EUROPEAN TOURS

A maximum of travel through
particularly interesting countries
at a minimum of expense is pro-
vided in the Canadian National
Educational Tours this summer
through Scotland, England, Bel-
gium, France, Switzerland and
Italy.

Two tours have been arranged
and sailing will be made from
Montreal July 8, on the "Andania"
direct to Glasgow. Very careful
attention has been given to itine-
aries involved.

Tour No. 1 is a 37 day trip on
sea and land, visiting important
cities in Scotland, England, Bel-
gium, France and Switzerland.
All expenses, \$372.50, Montreal to
Great Britain and the Continent
and return to Montreal.

Tour No. 2 is a 51 day trip on
sea and land, visiting in Scotland,
England, France, Belgium, Switzer-
land and Italy. All expenses,
\$501.00, Montreal to Great Brit-
ain and the Continent and re-
turn to Montreal.

There will be low excursion
fares to the seaboard from points
in the Prairie Provinces.

These tours will be personally
conducted from Western Canada,
and while overseas, will be under
the direct care and supervision of
thoroughly responsible and re-
liable organization, fully qualified
in every particular to successfully
look after the interests of our
patrons.

The sight-seeing program is
very complete and generous. Mo-
tor coaches and automobiles are
freely used. All sight-seeing is
well planned to save unnecessary
fatigue and to see the worth-while
places within the time at our dis-
posal. Competent lecturers will
reveal to our patrons the out-
standing features, literary, his-
toric, artistic or scenic of the Old
World centers visited.

J. T. Kerr, local agent for the
Canadian National Railways, will
be glad to discuss these tours and
arrange all details.

that seemed to be in the hands of
a musical artist. As we said be-
fore, casting no reflection on the
part of the other pupils, we be-
lieve he stood out as the gem in a
brilliant crown of pearls. His
rendition of this selection astound-
ed the audience, as no one could
believe that he had in our midst
one so young yet so advanced in
the musical world by simple nat-
ural ability.

It placed little Jack Stranaka
in a very difficult position to fol-
low such a skilled artist as the
one preceding him, but he cer-
tainly distinguished himself in the
rendition of "Minuet in G" bring-
ing out all that the composer in-
tended in a manner that brought
great applause.

One other duet was rendered by
Misses Emma Durrant and Eileen
Webster, entitled "The Keepsake"
a beautiful thing rendered in a
manner that left little to be de-
sired, and brought to a close a
program that would have done
credit to professionals of many
years' experience.

Just after the closing exercise,
Miss Aileen Spice, on behalf of
the class, presented Mr. Jones
with a beautiful tie pin, after
which a social hour was spent.

Around the Town

Born—On April 21st, to Mr.
and Mrs. C. McCormack, a son.

Mrs. Conway's mother and
sister left last week for their
home at Niagara Falls.

School re-opened on Monday
with an increase of 17 pupils.

Rev. W. and Mrs. Simpson, of
Calgary, were guests at the re-
ception over the week-end.

Rev. Wood was unable to
hold service at Alix on Sunday
owing to the condition of the
roads.

Miss Netta Oldring has re-
turned home from Edmonton.

The anniversary dance of the
Oddfellows will be held in the
Grand Theatre on the 29th of
May.

The W. A. of the Anglican
Church will hold a sale of work
and home cooking in the Lab-
rary building on Wednesday,
May 4th from 2.30 until 6 p.m.;
tea will also be served.

Tuxis, Monday 7 p.m. C.G.I.
T., Wednesday, 7 p.m.; Trail
Rangers, Friday, 7 p.m.; Ben-
vors, Saturday, 10 a.m.

H.J. Snell, Optometrist, will
be in the W. I. building, Mirror,
on Friday, April 22nd and
every third Friday of the
month thereafter.

One of the most successful en-
tertainments ever put on by the
Ladies Aid of the Ripley dis-
trict was held recently when the
ladies cleared a nice sum to
recompense them for their in-
labors. All report a splendid
time.

Pioneer Industry Flourishes in Quebec

Upper Left: Maple sap being poured into a can — a very popular delinquency. Upper Right: Fair visitor enjoying a taste of the delinquency. Lower Left: Gathering sap from the tree-trunk. Lower Right: Tapping the trees in mid-winter.

One of the sure signs of spring about the Cana-
dian Pacific Express yards in Montreal is the
appearance of large consignments of maple sugar pass-
ing through their hands for local distribution and
outside shipment. Some of the shipments are des-
tined to points out west. In the main these are for
former residents of Quebec who become homeless for
this Canadian delinquency and send an order through
their friends in the east.

The maple sugar industry is one that has been
carried on in Quebec for many years. The syrup
and sugar made in this province have established a
reputation for purity. Adulterating the syrup with
cane sugar is a practice that is strictly guarded
against.

Out-time maple sugar bees are still held all over
the province with the melting of the snow and the
first running of the sap in the trees at around the
end of March and the first two weeks of April, while
the product is one of the most useful and profitable in
the farming industry since it brings in much needed
money at a time when that commodity is scarce.

A good example of a typical French-Canadian
maple syrup farm is the one owned by Hiram Foster,
at Knowlton, Quebec. In this case the trees, which
number 1,400, are tapped in mid-winter by men who
travel the woods on snowshoes and cut down the
work. The trees are tapped at the snow line,
which is about three or four feet from the
ground. By gathering the trees are high above the
ground. Large trees take two cans and small ones
one can, while the trees are never tapped in the same

places as in former years. The method of tapping is to hang the cans on the
limbs and allow the sap to drip into them and all cans
are properly protected so that no unsanitary and
foreign substances can collect in them. The success
of any season depends largely on the weather. The
best seasons are those when there are night frosts
with more still on the ground which thaws during
the day.

The maple trees attain a circumference in some
cases of ten to twelve feet. The method when the
sap is gathered is to bring it to a shack in the woods
and boil it until all the water evaporates and pure
maple syrup is left.

The maple woods in the Eastern Townships section
of the province are a beautiful sight at maple sugaring
time. Citizens of Montreal take the opportunity
yearly to go out into the woods and eat the fresh
maple sugar. On these sugaring parties members fill
bags with fresh snow. On top of the snow they place
the boiling maple sugar. When the sugar cools they
have a most exquisite delicacy.

The industry is still in its infant stage. When
the Canadian government finally makes it a penal
offense all over the Dominion to adulterate maple
sugar, thus protecting the farmer, thousands of acres
still be brought into profitable exploitation and mil-
lions of dollars will accrue to the farmer. Once any-
one has tasted the pure sugar, and especially on the
spot of its production, a lifetime habit is formed that
is seldom ever to be broken.

Printing That Is Worth While

The Postoffice Department suggests that all
should have their return address printed on
their envelopes. Unless this is properly done
it is not worth while. We can print and sup-
ply envelopes for very little more than you
buy the envelope at retail.
